## **Removal of Strelitzias Nicolai**

Acting on the advice of the Community Association Head Gardener, the CA Gardens & Grounds Sub-Committee has adopted a policy of removing all Strelitzias Nicolai from Community Association property. Amongst other problems, they are a haven for vermin, are difficult to control and when they become large look extremely ugly and out of keeping with the landscaping aesthetic of the estate. Residents may have already noticed the removal of these plants at the front of Sherwood Apartments and, more recently, on the corner of Brompton Road & The Serpentine where the growth was complete eyesore. It is anticipated that remaining Strelitzias Nicolai will be removed over the course of the next six months or so.

Any Strelitzias Bird of Paradise species are required to be maintained to an appropriate size which is no more than a metre in diameter.

Yours Sincerely,

Community Association Estate Management
